**NOTES:**

- Counterweight doors must be installed to structural surfaces. Suitable materials include concrete, core – filled masonry, RHS steel or PFC channels. Unsuitable materials are metal stud walls, office partition walls or hollow masonry. Jamb must be plumb and true.
- All counterweight door tracks are fitted behind the walls – not between or in front of the walls.
- Mirage counterweight doors are suitable for high cycle applications.
- The maximum recommended opening size for a Series 5000 door is 10000mm wide x 8000mm high. Consult the manufacturer should opening size requirements exceed this size.

Mirage Doors has a continuous program of product development and reserves the right to change specifications at any time without notice.
