

SQUARE SUPPORT POST
76x76mm. Product Code AE / MSP / 76x76

Mirage Standard Extruded Aluminium
Side Guide Channel.

Mirage Heavy Duty Extruded Aluminium Post.
Product code AE / MSP / 76x76. Designed to
help support and to help conceal the roller
grille or roller shutter standard side guide.
Post wall thickness is 2mm.

The guide protrudes from the top of the
square post with the top flared. The side
guide is positioned to give a flush finish with
the face of the post. This allows for a 10mm
gap between the back of the guide and the
inside of the post. This unique feature allows
Mirage to install or service the door without
interrupting the ceiling/bulkhead or removing
the posts.

Base and head fixing plates are available as
an optional extra.
